Junior Board of Trade.

The Junior Board of Trade held its first business meeting last Thursday evening, when the Constitution was approved and future activity discussed.

As its objects, the Junior Board of Trade proposes:

1. To promote the business interests of Didsbury and district.
2. To promote good fellowship among the young men of the town and farming community.
3. To educate members to a fuller realization of their responsibility as citizens of the community.
4. To promote any project having as its object the betterment of the interests of Didsbury and district.
5. To co-operate with the Senior Board of Trade.
6. The activities shall be non-political and non-sectarian.

The previously appointed chairman of committees outlined the work in its respective sections and there were many favourable suggestions offered from the floor.

Mr. N. S. Clarke, honorary president, gave a short talk on the value of the Board and the excellent work it could do. He commended the young men on their enthusiasm.

It was resolved to support the holding of an annual School Musical Festival of the Olds Inspectorate in the town of Didsbury, and a resolution to that effect will be presented to the School Board.

With W. A. McFarquhar as chairman, plans were made to hold a free community picnic early in August. Efforts will be made to revive the local band.

Obituary.

Mrs. A. G. STUDER

Mrs. Effie May Studer, wife of Mr. A. G. Studer, pioneer Didsbury merchant, died at a Calgary hospital on Sunday morning, July 10th, after a long illness, at the age of 61 years.

Mrs. Studer was born at Uxbridge, Ontario, and was one of the pioneer residents of Didsbury, coming here 37 years ago. For many years she was deeply interested in the social affairs of the town and was a charter member of the I.O.D.E., later being made an honorary member. During the war years Mrs. Studer was treasurer of the local Red Cross branch. She was also a pioneer organist at the Presbyterian Church.

During her long residence here she had acquired a large number of friends, and the whole community deeply regrets her passing.

Surviving are her husband, Alfred G. Studer; two daughters, Mrs. Mae Campbell, of Vancouver, and Mrs. Winnifred Beveridge, of Didsbury; one son, Cecil, of Edmonton, and three grandchildren.

Private services were held from the residence on Tuesday afternoon, Rev. A. D. Currie officiating, and interment followed in the Didsbury cemetery.

Didsbury Farmer Road Route Critic

Construction of a new highway one and a half miles east of Didsbury is being done at an excessive cost compared with the outlay that would be required if the route crossed the eastern limits of the town, in the opinion of R. H. Eubank, farmer from that district, who is a visitor here.

The new highway is being built by the provincial department of public works and covers a distance of approximately 65 miles from Red Deer to Crossfield.

"Didsbury is the only town on the route that the new highway passes up entirely," said Mr. Eubank.

"On the new section of the road at Didsbury, three bridges and a subway will have to be built over a stretch of seven miles. Also a school and barn have to be moved. The power line has already been moved."

"If the government had chosen a route nearer the town, the only extra work would have been a fill on the grade. We understand that Hon. W. A. Fallow, minister of public works, stated that a fill was all that was necessary. Yet the government is running the road on another route, with all the additional cost. It looks as if the main reason is to experiment in building a subway on this road," he said.

Mr. Eubank said 960 people, out of a total of 1,050 electors at Didsbury had petitioned the government to adopt a different route but the request had been turned down.—Edmonton Journal.

WEDDINGS

KNAPP—McGHEE

A very pretty wedding was solemnized on Tuesday evening by Rev. Dr. Paton in Scarboro United Church when Bernice Elizabeth, eldest daughter of Mr. and Mrs. James A. McGhee, Didsbury, was united in marriage to Mr. Melvin J. Knapp, only son of Mr. J. E. Knapp and the late Mrs. Knapp of Swift Current, Saskatchewan.

The bride entered the church on the arm of her father. She wore a floor length gown of white satin and lace and her filmy veil had a coronet of orange blossoms. She carried a shower bouquet of tea roses.

Miss Evelyn McGhee, only sister of the bride attended her, becomingly gowned in pale yellow net over taffeta with blue net cap and mitts. Her bouquet carried out the color effect of blue and yellow.

Dr. W. M. Duncan acted as groomsmen and the ushers were Mr. Hugh McGhee, brother of the bride and Mr. Ralph Duncan, cousin of the bride. Mr. W. Webster played the wedding music and during the signing of the register Miss Cleon Duncan sang.

After the ceremony a wedding supper and reception was held at the home of the bride's aunt, Mrs. Thomas Stark. The rooms were tastefully decorated with pale pink peonies, and the bride's table was centred with the wedding cake, flanked by tall pink tapers. The tea table was presided over by the bride's two grandmothers, Mrs. S. E. Low of Carmangay, in royal blue crepe with hat to match, and Mrs. O. W. Owen of Olds, in black georgette. They both wore corsages of pale pink rosebuds.

Mrs. J. A. McGhee in a floor-length model of brown lace with large picture hat to match, and Mrs. Stark in black crepe with large black hat, received with the wedding party.

Those who assisted in serving were Miss Mabel Weberg of Victoria, Miss Gwen Low, Miss Myrtle Hagen and Miss Velma Murphy.

Following the reception Mr. and Mrs. Knapp left to motor through the mountains, the bride travelling in a navy suit with accessories to match. They will reside in Swift Current, Saskatchewan.

A former resident of Didsbury, Miss S. Burgess of Calgary was visiting friends here last week.

Horses to Go to Spokane, Wash.

Great interest is being shown in W. J. Fulkert's fine Kentucky horses.

Mr. A. W. Paterson, of Spokane, has just purchased two outstanding fillies, both chestnuts, with style and quality to spare. These fillies will be left with Walter Fulkert for training.

Mr. Paterson owns a 14,000-acre oil lease in Montana, besides other holdings. He was accompanied by Mrs. E. M. Fike, proprietress of the Rainbow Hotel at Shelby, Montana, who snapped 84 pictures of the Fulkert horses.

Will Give Report On Cheese Factory

A meeting will be held in the Neapolis School on Monday evening, July 18th, at 8 o'clock, when the investigation committee will give its report on the feasibility of the erection of a cheese factory in this district.

Speakers from the Lyndon Co-operative Association will address the meeting. Everybody welcome.

At The Movies

"Kid Galahad"—Strong Dramatic Fare

With three of the strongest personalities of the modern screen—Bette Davis, Edward G. Robinson, and Humphrey Bogart—heading the cast, "Kid Galahad," a Warner Bros. drama of the fight ring, comes to the Opera House this weekend.

Made from a best selling novel by Francis Wallace, which also ran in serial form in a national magazine, "Kid Galahad" has a very potent story, woven into the background of the sporting world.

Robinson plays a fight promoter who has one contender for the championship "Fluff," his girl friend, played by the very capable Miss Davis, aids and abets him in his work. Bogart is a rival promoter and a killer.

The story of the two rival fight managers and their attempts to doublecross is swift moving and full of action. The fight between "Kid Galahad" and Bogart's man, Chuck McGraw is one of the most terrific ever screened.

Packed with wallop after wallop and a double "bumping off" for its climax, "Kid Galahad" is a picture you won't want to miss.

Field Day Postponed.

The field day which will be given by the Mountain View Co-operative Livestock Association at the Olds School of Agriculture has been postponed until Saturday, July 30th, in order to arrange suitable dates for the prominent speakers who will give addresses during the afternoon.

The speakers will be: Hon. Jas. Gardiner, Dominion Minister of Agriculture; Hon. D. B. Mullen, Provincial Minister of Agriculture; Dean Howe, University of Alberta.

This field day will be of special interest to all farmers in the district and all are invited to attend.

Free coffee and ice cream will be supplied at noon and visitors are asked to bring lunch baskets.

The demonstrations and lectures will commence at 1:30 p.m.

Red Cross Says "Thank You,"

The Red Cross Society is thankful to the people of the Melvin district for the \$24.50, proceeds of a dance given at the Melvin Hall last month.

Gold Where It's Found

"There's gold where you find it."

It's an adage familiar to prospectors who dare the lonesomeness of the wilds, the heat of the summer and the snow and ice of the winter in the hope of some day striking that elusive vein which shall put an end to their toils. It is not only current among prospectors, but the truth of its assertion has recently been perpetuated in movieland as the title to a popular film.

The adage gives point to many a saga of the hinterlands where men have grown grizzled and grey in a vain search for the precious metal and have finally lain down pick and shovel at life's end, their labors unrequited. One feels stirred to pity at such stories and is tempted to wonder if they might not have found a better reward if they had pursued some other venture, less romantic but more remunerative. Perhaps they might have done better had they observed and heeded the call of opportunities close at hand instead chasing the rainbow which led them far afield.

Other Opportunities

Similarly one may be led to speculate at times whether some of our governments are not passing up an opportunity which lies at their door to develop to its utmost, latent wealth which might perhaps be readily attainable, or developed to a much greater extent than it has been in recent years; whether or not some of the efforts which are being made to search for hidden riches in remote areas might not return steadily cumulating dividends of greater value in the long run if they were turned to the cultivation of prospects outside our back doors.

Specifically, reference is made to the tourist traffic from south of the international boundary line—a plum of great value that will soon be ripe for the plucking if the field is cultivated with care and the product is nursed with an eye to encouragement of a greater yield at harvest time.

That there are great potentialities in this comparatively new found industry, and that it would respond readily if the necessary encouragement were given, there can be no doubt, when one reads of the growth it is making with the comparatively small effort that is being made to develop it. One finds, for instance, without any undue effort on the part of the people of this country and their representatives, that it is an industry that is growing rapidly and materially and one is inclined to wonder whether greater efforts would not bring astonishing results, and in a very short time.

For instance, latest statistics, just to hand, reveal that the total estimated expenditures in Canada of tourists from other countries during 1937 amounted to approximately \$294,682,000 compared with \$251,299,000 in 1936, a gain in one year of \$43,383,000 and of this amount a total expenditure of \$277,710,000 is attributed by the Department of National Revenue at Ottawa to tourists from the United States.

A Growing Industry

The total for last year is not far short of the value of the Western wheat crop in an average normal year, though it is true that the bulk of the benefit is derived by Eastern Canada and British Columbia. Nevertheless, when this comparatively new-found gold mine yields an increase of approximately 15 per cent. in one year without any great effort being made to develop it, one is warranted in anticipating that more vigorous prosecution of effort would result in increasing production by leaps and bounds.

The figures amply demonstrate that the "ore" is available in much greater quantity and that Americans only need greater encouragement to visit this country in increasing numbers and thus assist in improving our revenues.

If Western Canada is to share to a greater extent in this potential source of wealth it is absolutely essential that more attention be given to the highways of the country. More links are needed between the highways on both sides of the international boundary, and greater efforts should be made to improve and maintain in a high state of efficiency the highways already built.

While it is true that the Canadian west has much of interest to offer to tourists from the south, more could be done to add to the attractions. There is much land in the prairie countries which is not of sufficiently high quality to farm profitably and some of this land could be converted into parks, game preserves and beauty spots under a program of reforestation.

Publicity Needed

And when more good roads are available and more and wider areas are developed as parks and playgrounds, not only for visitors from the south but also for our own people, the necessity of making these attractions well known to prospective tourists by a well directed and co-ordinated publicity program should not be overlooked.

It is true that something has been done in this direction in the past but depression has impeded progress. Now, it appears, however, that the time is approaching when much more can and should be done and the value of such an undertaking will not be hampered one iota if much of the work is undertaken as an unemployment relief measure.

Battle With Bear

Boy Owes His Life To His Two Sisters And A Police Dog

A story comes from Peesane, Sask., that Pete Herrington, 14, owes his life to the bravery of his two sisters and to their large police dog. The lad, while hunting some cows, espied a young bear cub behind a log. He stooped over to pick it up only to be struck a terrific blow by the huge paw of the mother bear which had come up behind the lad. The blow was so heavy that the boy was knocked unconscious.

Pete's two sisters, Florence and Marion, witnessed the affair and without any thought of their own safety they, with their dog, rushed forward. The dog made straight for the bear, grabbing it by the throat, and there ensued a battle for life. Meanwhile the girls were able to drag their brother to safety amid the barking of the dog, the growls of the bear and the shrill cries of the cub. The dog eventually drove the bear into the bush.

Pete is proud not only of his sisters and the dog but also of the marks of battle on his neck and back, which he proudly exhibits.

Will Continue Giving

Lord Nuffield, British philanthropist, in accepting a degree from the University of Sydney, Australia, said "I promise to continue to do everything possible for the suffering and deformed."

Titled Cleric

Canada's Only Titled Clergyman Leaves For England

Sir Francis Heathcote, Archdeacon of Vancouver, was bound for England, slightly confused over the turn of events that have made him Canada's only titled clergyman.

Leaving Montreal for Quebec, where he boarded the liner Empress of Australia for England, the tall, handsome cleric who came to Canada from England in the 80's, told reporters he had little or no information on his inheritance.

He said his succession to Sir Gilbert Heathcote was bewildering because he had been so far down the line.

"I'm the sixth son of a third son," he said, "and there was also a nephew in between, but they're all dead now."

Sir Francis has no church in Canada, the Vancouver archdeaconate being an endowment of Lady Burdett-Coutts.

Ye Olde Cheshire Cheese, famous old London inn, never employs a waiter named William, out of respect for the memory of Old William, favorite waiter on 18th century literary greats.

Thomas A. Edison's famed deafness came about when, as a boy, he ran after a moving train and a brakeman grabbed him by the ears to haul him to safety.

"GET A LINE ON OGDEN'S—"

Tie up with a real treat! Roll-your-own cigarettes with Ogden's Fine Cut and you'll corral the fuller smoking enjoyment that this cooler and more fragrant tobacco gives. You'll roll them even better if you make sure to use "Chanteclair" or "Vogue" papers.

Big Fleet For Russia

Soviets Plan To Greatly Increase Naval Power

Plans intended to make Soviet Russia one of the great naval powers of the world are being pushed and should begin to bear fruit within the next four or five years.

Realizing a great maritime Russia is not possible without a powerful high seas fleet, Soviet leaders have already completed the initial technical work which will give the nation a huge four-arm fleet grouped on the Baltic, White and Black seas and the Pacific ocean.

Equipment is now ready by which the nation should be enabled to manufacture big calibre guns up to 15.78 inches together with powerful protective armament. Foreign technical help will be used in the early stages of the construction period. The last two modern cruisers built at Leningrad were constructed with the aid of Italian engineers.

'SELECTED RECIPES

ORANGE CREAM

2½ cups milk
½ cup white sugar
1 tablespoon St. Lawrence or Durham Corn Starch
3 tablespoons orange juice
2 tablespoons lemon juice
1 tablespoon grated orange and lemon rind mixed
2 eggs separated
¼ teaspoon salt

Add grated rinds to juices and allow to stand. Scald 1½ cups milk in double boiler. Add sugar and corn starch mixed with remaining cold milk. Stir constantly until thick. Cook 10 minutes stirring frequently. Add beaten egg yolks and salt. Cook 5 minutes. Add strained fruit juice and cool. Pour over cut up oranges sweetened to taste. Cover with meringue made of the stiffly beaten egg whites with 2 tablespoons fruit sugar. Brown slightly. Crushed pineapple is a nice addition to oranges.

No Infringement

Motion Picture Company Wins Appeal In Copyright Case

Use of a song title as the name of a motion picture does not constitute an infringement on that song's copyright, the Ontario Court of Appeal ruled.

Accordingly, it allowed the appeal of Twentieth Century Fox Corporation Limited against a judgment holding that company liable to Francis, Day and Hunter, song publishers, for \$1,046.35 for using the title, "The Man Who Broke the Bank at Monte Carlo", in a picture. Neither words nor music were used.

"The owner of the copyright suffered no wrong by what was done," said Mr. Justice Middleton, for the court. "The idea, if any, of the song, its words and its music were not taken."

Turku and Vibourg, in Finland, are centres of the ant egg industry, exporting eggs from their farms to pet dealers and zoos throughout the world.

A baby grand piano weighs about 450 pounds.

Radio Plays

Cash Prizes To Be Offered By Broadcasting Corporation

It is the intention of the Canadian Broadcasting Corporation to encourage Canadian authors to write purely Canadian radio drama suitable for broadcast purposes, dealing with Canadian manners, and to obtain this sort of material it will offer cash prizes.

This announcement was made by Major Gladstone Murray, general manager of the Canadian Broadcasting Corporation, in an address to the Canadian Authors' Association, on "What Radio Has To Offer the Writer." A semi-independent board of adjudicators would be set up to decide on the material selected.

Major Murray told the association it was essential that radio work be done well. The spoken essay was the most important part of broadcasting. In this connection he referred to a recent successful broadcast of a story by Miss Mary Weekes of Regina, "The Last Buffalo Hunt", which was an example of the desired type of material. He also praised the broadcasts of Bruce Hutchison over CBO.

Quality of good radio writing should be its directness, simplicity and good use of Anglo-Saxon synonyms.

Sound of the language in a story broadcast was also a most important feature. Centre of the problem of radio broadcasts was the drama and the most successful so far had been adaptations of stage plays and novels. There had been some writing done purely for the radio, in Canada, but it had not been of very distinctive quality. There was a great and rich field for writing for the radio, dealing entirely with Canadian contemporary manners and the interpretation of one section of Canada to another section.

"I place art always in the foreground," said Major Murray. Canada should not be an imitator of foreign methods of broadcasting.

Rupert Caplan, of the Canadian Broadcasting Company, Montreal, and well known producer of plays, said the opportunity offered to write good radio plays had not been taken up seriously by leading Canadian writers.

Mr. Caplan said the radio listener to-day wanted to be entertained, more than educated. Canadian radio authorities were searching for good radio material, could not find enough of it. "It is not necessary to go up in the attic for it," he said. "It is all around you, in the home, on the street, in your every day life."

The Centre Of Unity

Throne Binds British Empire Together States Lord Tweedsmuir

Without the unifying power of the crown, none of the other ties which hold together the free, autonomous nations of the British empire would "bind for long," Lord Tweedsmuir said in an address at Bishop's college convocation in Lennoxville, Que.

"The throne is the centre of empire unity," the governor-general told the gathering at graduation exercises.

"What is there in common between peoples who represent every race-stock on earth?" he asked. "Yet these differences are differences within a unity. The throne binds the whole empire together and gives cohesion to a vast growth whose ultimate destiny is unpredictable. There are other binding influences, such as the bonds of sentiment and blood and of tradition, but without the unifying power of the crown none of these would bind for long."

"To millions of dark-skinned peoples in Asia and Africa and the isles of the sea, government means the person of the sovereign."

The importance of the British monarch is not in "what he does but in what he is," said the governor-general. "We are a democracy in which the will of the people prevails by means of their elected representatives. But the king represents the people in a deeper sense—abiding continuity of the nation behind all the mutations and vicissitudes of parties."

"Britain has rebelled quite often against kings. But never against kingship."

Walt Disney has purchased the rights of "Alice in Wonderland" books for a film cartoon, according to the London Daily Telegraph.

On Its Way Out

Straw Hat As Summer Headgear For Men Seems Doomed

It used to be possible to date the beginning of summer by the burgeoning of straw hats. Some fine Monday morning the usual sober grays, blues and blacks would almost all have disappeared, and one swam along a city street in an undulating swell of flat-topped straws, with here and there a panama drifting like kelp in the tide. In the afternoon, between 5 and 6 o'clock, there would be a heavy thunder shower. As the season passed, the hats grew dingier. Buttercups and goldenrod adorned the meadows, a few leaves were seen to have turned, and hat owners wondered if another cleaning would be necessary before the winds of autumn brought down the first premonitory flutter of felts and derbies. This year, however, felts have remained firm, and in some cases active, while straws have been sluggish.

Without taking sides in any controversy that may be brewing between the felt hat and the straw hat, one may regret this change. The straw hat, after all, demanded only a brief three months of life. It was not pretentious. The flat-topped sailor type gladdened many a sad heart when it blew off somebody else's head and went trundling down the street. It made a trainload of commuters all look alike, but their wives were generally able to get them sorted out. Is the straw hat doomed? Let us hope not.—New York Times.

Should Use Better Seed

Records Would Indicate Average Farmer Sows Indifferent Quality

Canadian farmers should take fuller advantage of the country's remarkable facilities for use of certified wheat seed, Dr. G. S. H. Barton, federal deputy minister of agriculture, told the Canadian Seed Growers' Association at Guelph, Ont.

From 10 bushels of certified seed there can be produced in five years 7,500,000 bushels of certified seed, the official said. Yet much potential registered and certified seed is being sold on the market.

Canada's seed requirements in wheat, oats, barley, rye, peas, beans and buckwheat approximate 70,000,000 bushels annually. Of the 70,000,000 bushels, only one per cent. of registered seed grain and less than three per cent. of certified seed grain were available this year.

"Seed drill surveys, crop testing records and other sources of information indicate that the average farmer sows indifferent quality and mostly nondescript grain," Dr. Barton said.

A Hand-Printed Bible

Swede Has Completed Work He Started Seven Years Ago

After seven years' work, Gustaf Wennlund, a draughtsman employed by the Swedish railway company, has completed his own Bible having drawn each of the 4,000,000 letters by hand. He started work on February 12, 1931. Each of the 1,612 pages took him between two and a half and three hours. Stockholm reports he has insured it for \$5,000.

Bamboo plants may grow as much as three feet in 24 hours.

Farmers Insured Against Rust Damage Through The Use Of Thatcher Wheat

Saskatchewan farmers have taken out insurance against heavy rust damage through using 367,000 bushels of Thatcher rust resistant wheat as seed this year, the Saskatchewan branch of the Canadian Seed Growers' Association reported at the annual meeting. Rust did \$75,000,000 damage to Saskatchewan wheat in 1935.

Reporting on the agricultural revolution in northeast Saskatchewan where farmers have found new prosperity through raising high-grade alfalfa, the report predicted a 2,000,000 pound alfalfa seed crop this year.

Production of registered alfalfa seed during 1937-38 in Canada was 2½ times that of the previous year, Secretary W. T. G. Wiener of Ottawa, reported. This was the direct result of increased plantings in northern Saskatchewan coming into production.

Stocks of the following crop varieties and strains were mentioned as registered for the first time in 1937: Wheat: Thatcher and Red Bobs; oats: Erban and Vanguard; barley: Nobarb; flax: Redwing; soybeans: Kabott; corn: White Capped Yellow Dent; millet: Crown and Empire; carrot: Chantenay and Nantes; pea: Prince of Wales; citron: Red Seeded; timothy: Swallow; swede: Wilhelmsburger (D.E.F.L.)

Production of grass, clover and alfalfa seed by Manitoba farmers has multiplied six times in the last three years.

Revenue from those crops was \$75,000 in 1935 but last year Manitoba farmers received \$466,000 from them, the Manitoba Seed Growers' Association said in its annual report. Manitoba is now producing more than half the brome grass seed and two-thirds of the sweet clover production for Canada.

If farmers were as particular in the selection of their seed grain as they are in the selection of herd sires, there would be an "immediate" improvement in crop production, Hon. P. M. Dewar, Ontario minister of agriculture, said. There had been "too much haphazard production of cereal crops in the past."

Relief from drouth conditions in the west should be followed by improvement in wheat seed quality, F. W. Townley-Smith of Lashburn, Sask., declared in his presidential address.

Consideration of the export market was urged on the growers in their use of new varieties. Those who have no fear of rust should continue to use "our wonderful old standby Marquis," Mr. Townley-Smith said, "at least until such time as our overseas buyers have definitely told us that our new wheats are just as good."

Care should be exercised in growing more than one variety of wheat on one farm, he said, for varietal impurity is a main problem among farmers. Meticulous check must be made on all machines to prevent mixing at seeding times, in the growing season, at harvest time and more particularly in threshing.

Champion Letter Writer

English Clergyman Who Wrote Thousands To Editors Is Dead

Hailed as Britain's champion writer of letters to the editor, Rev. J. P. Bacon-Phillips, who wrote more than 60,000 letters to editors in 59 years, and carried a brief case full of pipes, tobacco, biscuits and foot ointment for tramps, died at Burges Hill, England. He was 81 years old, and had written more than 9,000 letters to newspapers dealing with the superiority of nightshirts over pyjamas, the value of his own moustache as a germ-strainer, the value of his beard in keeping him warm in winter and cool in summer, social injustices, strange customs and little-known facts.

Spaniards who cross Andorra, the "pocket republic of the Pyrenees," on their way to take refuge in France, are weighed and pay a toll of six cents a pound, the average toll being about \$12.50 a man.

Any blue feather, if pounded to powder, changes to black.

Weird Remedies

John Wesley's "Plain And Easy Way Of Curing Diseases"

Among John Wesley's numerous works the most curious is his "Primitive Physic," published in 1747 as "a plain and easy way of curing diseases." "Primitive" was undoubtedly the operative word, and not even his most ardent admirers would to-day care to try some of the recommended remedies.

"The Ashma: Live a fortnight on boiled carrots only. It seldom fails," was one piece of advice. To prevent nose-bleeding, drinking "whey largely every morning" is recommended, but "in a violent case go into a pond or river. Tried." For whooping-cough the alternative to rubbing hog's lard on the feet before the fire is rubbing the back "at lying down with old Rum. It seldom fails."

Half a pint of tar water, morning and evening, does not sound an attractive cure for cramp. Much more romantic is the juice of marigolds; rubbed on warts "it will hardly fail."

Wesley's remedies are sometimes strongly alcoholic. He records the case of "a middle-aged man in the West of England (who) drank every day five or six quarts of cyder; and without any other medicine, was totally cured in a few weeks time of a dropsy long supposed to be incurable."

For consumption Wesley had fifteen prescriptions, including "every morning cut up a little turf of fresh earth, and lying down, breathe into the hole for a quarter of an hour . . . Or, drink thrice a day, two spoonfuls of juice of Water-Cresses. This has cured a deep consumption."

For raging madness: "Set the patient with his head under a great waterfall. . . . Or, let him eat nothing but apples for a month. Or nothing but bread and milk. Tried."—The Manchester Guardian.

Unique Monument

Pays Tribute To Men Who Were Executed For Treason

Standing at Canada's Niagara Falls gateway, unveiled in its simple beauty of massiveness, is a monument, unique in Canada and perhaps in the world. For inscribed on it as worthy of honor are the names of 28 men executed for treason.

The monument, the Clifton Memorial Arch, unveiled by Prime Minister Mackenzie King, was first conceived as a memorial to those 28 men executed for their part in the rebellion of 1837. These 28, together with their leader, William Lyon Mackenzie are now honored as pioneers of responsible government in Canada.

As the idea of the memorial took shape, vision broadened and the memorial became one to all the pioneers. The chief inscription reads:

"This memorial was erected to honor the memory of the men and women in this land throughout their generations who braved the wilderness, maintained the settlements, performed the common task without praise or glory and were the pioneers of political freedom and a system of responsible government which became the cornerstone of the British commonwealth of nations."

Long Bicycle Tour

Native Of India To Attempt Trip Around The World

"I want to prove that a poor man can see the world provided he is physically fit. I do not want hospitality shown me in the shape of money; all I want throughout my adventure is a little food and shelter," said Manna Singh to a reporter before he left Calcutta for a round-the-world tour on a cycle.

When questioned how long the journey would take him, Manna Singh replied that he hoped it would not be for more than seven years.

"I am fully conscious what the project means," he continued. "There will be occasions when people will not be hospitably inclined towards me, but in such an emergency I hope to earn my food and shelter by palmistry, cycle feats and delivering lectures in schools on my experiences." — Calcutta Statesman.

History Of A Fire

Pioneer Tells Story Of The Burning Of Vancouver

George H. Keefer, of Cobble Hill, B.C., answered an old question when he said he was accidentally responsible for the fire which raced through infant Vancouver June 13, 1886, to leave the little logging town of 5,000 population a heap of smoking ashes.

The story was told in the Cowichan Leader, weekly newspaper published in this Vancouver Island farming centre. Keefer said he reached the coast 53 years ago and took a contract to clear what is now Vancouver's west end.

"There was some dry brush which I thought might be a fire menace to the Indians," Keefer said, "so . . . I set fire to this brush to clean it up."

"While we were at dinner the cook came in and asked: 'Did any of you fellows set a fire along the beach?'"

"I said: 'Yes, I did.'"

"Well," says the cook, 'come and look at it now.'"

"We got up from the table and went to look. The fire had got into slashings and had a start that was beyond anything we could do."

"We watched the fire with fear and trembling all afternoon, and only when the sun went down and the wind with it were we able to get back to the city—or the place where the city was."

"We could see that not a building was left standing, nothing but blackened stumps, a few bricks here and there, and wire mattresses and an old safe or two."

"This is the real truth of the burning of Vancouver, and I struck the fateful match."

Duty Of Parents

Faulty Up-Bringing Of Children Damaging To The State

Father of two children, Raymond Henniker-Heaton, noted psychologist, shocked delegates attending the conference of the British Union of Practical Psychologists by branding as public enemies Nos. 1 and 2, parents of the growing generation.

"It is a pity we have to have parents," he said. "In Victorian times sentimentality about mothers was non-stop and it hasn't stopped yet. There were songs 'What Is Home Without a Mother,' and 'A Boy's Best Friend Is His Mother'."

"Yet in spite of all these eulogisms, who is the potential, the most deadly enemy of the boy? The mother is and the father comes a good second."

Mr. Henniker-Heaton attributed the present state of "chaos and unrest" to the faulty upbringing of the individual. The tragedy of the badly-reared child went beyond the individual. It was damaging to the state and to the highest development of the human race.

"Indeed, more children are ruined by parental love than lack of it," he said.

"I haven't much to say on behalf of father, except that he doesn't sail under false colors. He has nothing to live up to. No song extolled his virtues even in Victorian times. I remember only 'Father, Dear Father, Come Home With Me Now,' which is not so flattering."

Eggs will keep better if stored with the small ends down.

Use Of Rocket Aircraft May Pierce The Veil That Hides Us From The Stars

Plant Disease Specimens

Growers May Send Specimens To Nearest Laboratory Of Plant Pathology

There exists in each province of Canada at least one laboratory where specimens of diseased plants may be sent for identification. The research workers stationed at these laboratories are employed on problems relating to the more troublesome diseases of the cultivated crops of the provinces in which their laboratories are located. Thus the workers in Saskatchewan are chiefly concerned with cereal crop diseases. At the same time most of these men have a general knowledge of the principal diseases of all the plants commonly grown in their region and if more detailed information is needed they know where to obtain it.

Growers whose crops are affected by disease may send specimens to the nearest laboratory of plant pathology for examination. Usually the plant pathologists are able to suggest means of controlling the infection although this is not always the case. There are certain plant diseases for which no satisfactory methods of control are yet known.

Those sending specimens for diagnosis can assist the plant pathologists considerably by observing certain rules in preparing the specimens for shipment, states R. C. Russell, Dominion Laboratory of Plant Pathology, University of Saskatchewan, Saskatoon. The whole plant should be sent if it is not too large. If the plants are small several should be sent. Specimens should be thoroughly dried before they are mailed so that they will not spoil in transit. Leaves and flowers may be pressed and dried between sheets of newspaper in order to preserve their shape and appearance. Each specimen should be carefully labelled with the place and date of collection and the name of the collector. Specimens may be placed between sheets of cardboard for protection from breakage in the mail. A letter should be sent explaining the nature and extent of the trouble as observed by the collector. Information on plant diseases can be obtained from the Dominion Laboratories of Plant Pathology at Winnipeg, Saskatoon and Edmonton.

A Los Angeles patrolman had brought in a negro woman somewhat the worse for wear and the desk sergeant, with his very best scowl, roared: "Liza, you've been brought in for intoxication!"

"Dat's fine!" beamed Liza. Boy, you can start right now!"

A single hair of a sheep's wool, when seen under a microscope, is notched like a saw. Wool, kneaded and beaten, is held together by the interlocking of the notches, and felt is the result.

A 15,000-acre plantation in the Belgian Congo is to be devoted to growing cinchona, source of quinine.

People who want to get off the earth may look back some day to the Eden Valley of New Mexico as aviators now honor the beach at Kitty Hawk, wherefrom the Wrights first took successfully to the air.

In Eden Valley Professor Robert H. Goddard is continuing his researches with rocket aircraft, safely remote from civilized communities that his machines might hit if they chance to go wrong. From Eden Valley came news of a new steering mechanism able to keep the rocket in its intended upward path even after its fuel is exhausted, instead of letting it turn back prematurely toward the ground.

From Eden Valley may come, some day not too far in the future, news that a new rocket at last has pierced the veil that hides us from full knowledge of the stars, perchance of the universe's future and of its past: the veil of viscous atmosphere that shrouds the earth.

Spreading outward from the science-fiction fans, knowledge now is general that rockets, invented centuries ago as Chinese contrivances to scare the enemy in war, promise to be the only craft able to fly in empty space, where no air is present for ordinary propellers to get a grip on.

Space rockets, however, are not Professor Goddard's present preoccupation. He is trying merely to get up in the air, not even all the way out of it. To the slow movements that can be made by a human being air offers only an infinitesimal resistance, but to greater speeds its ocean is almost as hampering as a sea of thick molasses would be to a swimmer. Once off in space, a rocket would need little power or fuel.

Years ago Professor Goddard himself worked out plans for rocket craft thus driven through the void by power of sunlight or even of starlight. The trouble is to get the rocket through the thick, resisting blanket of air that bars us from the freedom outside.

Even a few minutes in a rocket outside the air might well be worth a lifetime of ordinary astronomy, so handicapped are surface telescopes and astronomers by the dimmings and flickerings called bad seeing, and which are caused by looking through three hundred miles or so of air.

Even a manless rocket provided with cameras and recorders might be invaluable. Still better would be a rocket able to reach the moon and set up on its airless plains a manned or even unmanned observatory reporting back to us by automatic radio. Barring all these stands the air blanket, just as it covers and shrouds the telescopes.

For the present, Professor Goddard is trying merely to pierce the thickest lower layers of this blanket, perhaps a few miles farther above the ground that has been reached by airplanes or balloons. That goal seems almost, if not quite, in sight. Then will come the further goal of getting a rocket clear outside.—New York Herald Tribune.

Stuck To Her Statement

Author Told Proofreader Just What She Had In Mind

In one of her famous "Rebecca" stories, Kate Douglas Wiggin had written this sentence: "Rebecca sat by the window, chopping hash."

The proofreader put an interrogation mark after it, and added in pencil: "As hash is the finished product, was she not instead chopping meat and potatoes?"

When the author rallied from the effect of the comment she wrote her answer under the question: "There is a psychological moment when the meat and the potatoes blend into hash. It was this moment I had in mind."

For Denmark's Tall King

Fat members of King Christian's entourage must squeeze through the corridor of a new railway car so that the king will have room to sleep. The new coach was built with three inches less corridor room outside Christian's bed chamber so the king can lie down all the way. He is 6 feet 5 inches tall.

Goodness Knows We All Need These

Household Arts by Alice Brooks

Exquisite Star Design Enhances Doilies of Three Sizes

PATTERN 6164

These stars of the doily world are ready to shine together—on your luncheon table or separately on smaller tables! Crochet them in string or finer cotton. Fascinating pick-up work that's so useful, too. Pattern 6164 contains instructions for making the doilies; an illustration of them and of stitches; a photograph of doily; materials required.

To obtain this pattern send 20 cents in coin (stamps cannot be accepted) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

The World of Wheat

By H. G. L. STRANGE
Director "Crop Testing Plan"

We all note with sadness that Mr. George Broomhall, admittedly the greatest expert on international grain, is dead.

Mr. Broomhall was connected with the great wheat industry in England even before the first shipment of wheat left Western Canada 61 years ago.

He was ever a most sympathetic friend to the producers of all countries, and he never tired of drawing attention to the difficulties farmers had to contend with.

He ranks, in my humble opinion, in his service to agriculture, with the greatest plant breeders and agricultural scientists.

Perhaps no one word has been so grotesquely inaptly misapplied as the word "service," but judged by the very highest and most ethical standards Mr. Broomhall rendered to society a decided and most valuable service, for his material reward in life was but a microscopic fraction of the value of the contribution he made to the welfare of the people of all nations.

Mr. Broomhall's chief claim to fame, I think, is that the information which he accumulated so painstakingly from the far ends of the earth, and which he made available so freely to all, assisted materially in the efficient distribution of food stuffs from areas of abundance, where it could be spared to areas where there was a deficiency, and so where hungry people needed food.

Following factors have tended to raise price: U.S. threshing returns show greater damage from frosts and rust than expected -- Italy agrees to purchase Hungarian wheat -- Balkan corn crop needs rain. Crop deterioration in some sections -- Hungary sanctions Roumanian corn imports -- Poor outlook for groundnuts in Tanganyika -- Canadian apple crop below normal.

Following factors have tended to lower price: Italian wheat yields exceed expectations -- Wheat yields in Greece and Portugal exceeding expectations -- India is expected to export wheat freely -- European crop prospects better than expected -- Argentine potato crop shows sharp increase -- Large Italian fruit crop -- Generous rains in Western Canada improve wheat prospects.

Searle Precipitation Report No. 6

Taking into account the precipitation that occurred last autumn during the months of August, September and October, and the rains which have fallen this year from April 1st to July 1st, inclusive, and weighting for wheat acreage, the records reveal that the moisture situation for the three prairie provinces, as a unit, on July 1st, was 86 per cent of normal as compared with 90 per cent three weeks ago and 65 per cent for July 2nd a year ago.

The moisture condition for Alberta on July 1st was 90 per cent of normal as compared with 74 per cent at the same time last year.

For Saskatchewan on July 1st the

Burnside Notes

Mrs. Fred Thompson is visiting friends in Calgary.

Mr. Dave Thoman, Samuel and Ruth are attending camp meeting at Sylvan Lake.

Mr. and Mrs. Jake Ehret spent Sunday with Mr. and Mrs. Chris Ehret.

Didsbury U.F.A. and U.F.W.A. Association will hold its annual conference in the Lone Pine Hall on Wednesday, July 27th. Picnic lunch at noon. Ladies please bring basket. It is expected that Robert Gardiner and George Church will address the meeting in the afternoon.

The Lone pine W.I. met in July at the home of Mrs. Jack Gardiner. Mrs. Floyd Abigrim gave a splendid paper on "Canadianization and Immigration." A donation of \$5.00 will be sent to the Red Cross. Mrs. Joe Clarke gave a good report of the constituency conference. Mrs. N. Eckel won the prize in the spelling match. It was decided to have a picnic at the Olds Agricultural School on Thursday, August 4th. The Institute will meet for August with Mrs. Helen Birdale.

Scout and Cub Corner.

No Flaggng Classes until further notice.

Potatoes ensured this summer's camp for the boy scouts of High River, Alta. On a town lot provided by the town council each boy planted a bucketful of seed potatoes, and advance orders have contracted for the entire yield.

The purchase of "a dolla month," to be given to the Boy Scouts for their next Christmas Toy Shop, is one of the year-round activities of the Lethbridge, I.O.D.E.

A "Parents' Night" entertainment of the Thamesville Ont., Boy Scouts was interrupted by an urgent request from the local police for all Scouts to join in a hunt for a missing six-year-old boy. Shortly after midnight the Scouts found the boy asleep in a cemetery.

condition was 85 per cent of normal as compared with 51 per cent last year.

For Manitoba on July 1st it was 79 per cent as compared with 105 per cent last year.

Since July 1st, the date on which this compilation was made, unusually heavy rains have fallen over large areas in the West. The actual condition, therefore, at this moment over the whole West, is probably now nearer to 90 per cent than the 86 per cent indicated in this report.

Espionage trials of 195 military and civil officials of government Spain, in which about half face the death penalty, have begun in Madrid, travellers from Spain reported recently.

Request for an investigation into livestock marketing was made in the House of Commons by Harry Leader (Lib., Portage la Prairie) and seconded by Rt. Hon. R. B. Bennett, Conservative leader.

DOUBLY USEFUL TO JUNIORS!

By Anne Adams

Smartest of the smart, Anne Adams' new Pattern 4604 serves a double purpose. It can be made up into a frisky daytime dress, or it can have an ankle-length skirt for summer parties or graduation festivities. When you're stretching dollars, what a relief to know that both versions can use inexpensive cottons—gay percales or piques for one, sheer voiles or organdies for the other! Even if you are just learning to sew, you'll enjoy putting together the graceful skirt gored, and adding buttons and lace to the bodice. For the directions are extra easy to follow!

Pattern 4604 is available in girl's and junior sizes 6, 8, 10, 12 and 14. Size 12 short dress takes 3½ yards 36 inch fabric, and 1½ yards lace edging. Illustrated step-by-step sewing instructions included.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

FLIN FLON

"The Story of Its Finding and Position To-day"

By PRATT KUHN

TOM CREIGHTON
The man who discovered the Flin Flon Mine in 1915.

Just the other day we read again of Tom Creighton, the prospector who found Flin Flon.

He is now in charge of field crews for Hudson Bay Mining & Smelting Co. properties, and so is again actively in the prospecting game which he loves.

To our mind came the story we heard from Tom's lips one night in Flin Flon—the story of how he regained his health after four years' suffering from the crippling pains of arthritis.

To-day he is 64 and as active as a 35-year-old, lean, sinewy, hard muscled, and without a pain. Imagine that, after he was all twisted up in his toes, wrists and fingers, back, elbows and shoulders.

When Tom was twenty he fell 18 feet down an open hatchway and hurt his back, which went against him when arthritis struck.

Anyhow, when prospecting he weighed 165 to 168 stripped, and is now 144—his feeling being that a man should stay as close to the natural weight attained at 21 years of age as possible.

Tom searched everywhere with all kinds of specialists for an arthritis cure, and then heard of a Dr. Tilden in Denver, Colorado, who used natural methods. He went there in April, 1936, and between fasting, exercise, changing of the blood stream from acid to alkali, he spent six months, but came away like a new man, with a healthy body and only a little pain in one finger left.

I've watched Tom eating, and here's what his meals consist of:

Breakfast—Two or three Shredded Wheat Biscuits eaten dry, or with a little butter, chewed thoroughly and moistened through the natural saliva action. After that (and not with the Shredded Wheat) a good bowl of unsweetened fruit or a good helping of raw fruit.

Dinner—A dish of soup and a fresh vegetable salad.

Supper—Meat, salad, fresh vegetables and two cooked vegetables.

Notice anything strange about this diet?

Well, there's no tea, coffee, milk, water or liquor on it, and Tom drinks only one half glass of water a day—in the morning, just half an hour before breakfast—and never drinks with meals. Says he's never thirsty either. Another thing, he never eats starches and proteins at the same meal.

Perhaps you'll laugh at a prospector who paddles canoes, scrambles over rocks, does hard physical labor, taking exercise to keep healthy, but Tom does some special stunts like tensing the stomach and rotating the skin one hundred times with a hand on each side of the colon.

He never felt better in his life, and while he was using glasses for reading before his treatment his eyesight has improved so much that the glasses are unnecessary now.

Just thought some of our readers might care to profit by the health hints given by Tom who spent years of time and thousands of dollars to find out just how to live properly, and it was so simple that anyone who follows this regime will certainly improve in health and strength. Most of us dig our own graves with our teeth, through eating too much.

I wonder how Tom feels now (I haven't seen him for a year) in charge of prospecting for Hudson Bay Mining & Smelting Co., who own Flin Flon, the mine he found twenty

years ago and which in 1937 produced:

Copper	57,688,455 lbs.
Zinc	68,072,224 "
Cadmium	308,776 "
Selenium	74,288 "
Tellurium	7,684 "
and of the precious metals	
Gold	133,605 ounces
Silver	1,633,378 "

and remember that while there were 1,647,438 tons of ore mined from the Flin Flon last year, there are at present reserves blocked out for 15 years' more continuous operation.

To-day there is no relief, no talk of depressions and hard times in Flin Flon, Manitoba—the busy little city of 8,000 named after the mine; and pay checks amount to about \$280,000 monthly.

Because the civic authorities insist that everyone must be self-supporting, don't rush to Flin Flon unless you have money enough to get back. The civic authorities are a little hard-boiled about doling out relief, because they feel that everyone should be self-supporting.

And that's the final end of our Flin Flon story—for the present at least—though we may give you another picture later on because the subject is so interesting and so important to the people who live in the West, particularly in Manitoba and Saskatchewan.

Ready To Make Proposals

United States Government Wants To Secure World Disarmament

Prime Minister Chamberlain told the House of Commons that the United States government had intimated it was preparing to make definite proposals to secure world disarmament.

Asked by Arthur Henderson, Labor, if Great Britain were willing to "join with the United States government in making definite proposals with a view to securing a halt in the arms race," Mr. Chamberlain replied tersely:

"The United States government have suggested they are going to make an attempt."

The prime minister refused to elaborate on this brief statement.

There are about 2,500 species of snakes in the world, and 300 of them are poisonous.

Will Cost Ten Million

Rajah Of Bamra To Have A Buckingham Palace In India

With his dark eyes sparkling after an hour's foxtrot lesson, the 24-year-old Rajah of Bamra, told a Sunday Dispatch reporter in London of his plans to build a "Buckingham Palace" in his Indian State.

To be built in marble, with mosaic floors, lapis lazuli and onyx pillars and fittings, the cost will be £2,000,000 "at least."

The palace is to have automatic lights which switch on and off the moment anyone enters or leaves the rooms, illuminated fountains which will play night and day, and two swimming pools in green and black onyx.

The Rajah is in England to see British architects and engineers.

"I want the interior to be as like Buckingham Palace as possible," he said.

The young palace-builder, with jewels worth more than £50,000 for his ceremonial turban, talked about London's sixpenny stores.

He and his Prime Minister, A. K. Bose, have been making a tour of them.

"I have bought one or two 3d. and 6d. souvenirs," the Rajah said. "They are wonderful stores."

During his visit the Rajah has spent considerable time in two-penny Underground trips and in learning to dance.

Once a week special foods from his own cook at Deoga are flown by Imperial Airways to Croydon.

"I am keeping most of the food that has been flown over for me to take with me to the Continent soon," explained the Rajah.

"I am very interested in dairy farming, and I am to visit Holland because I am told their dairies are some of the best in the world."

"When I return to India I intend introducing your electric robot system for our roads."

Then the slender ruler of Bamra, tiger-hunter in his spare time, hurried off to another twopenny Underground jaunt.

TRUE STORIES OF CHEMISTRY IN EVERYDAY LIFE

BY DR. H.G. LITTLER.

Cellulose as a Chemical Raw Material

Modern Plastics in Everyday Use

Much of the progress made in recent years toward better living is due to the chemist. Starting with raw materials found in nature, he has created hundreds of new products for our health, comfort and happiness. Working in the twilight realm of atoms and molecules, the chemist has found that cellulose is a fruitful raw material for making a wide variety of beautiful and useful new products. A conservative estimate is that this widely-distributed material is at present put to more than 10,000 uses.

Cellulose is one of the most plentiful of nature's raw materials. Millions of tons of it are produced each year as the fibres or framework of practically all plants. Cotton "linters," the short "fuzz" left on the seed after the longer fibres have been removed by ginning, and trees such as the spruce and fir, are the principal sources of cellulose used for chemical purposes.

Among the more important products based on cellulose are rayon and transparent cellulose film. When cellulose is treated with a mixture of nitric and sulphuric acids, a product known as nitrocellulose or pyroxylin is formed, which is the basis for quick-drying lacquers, motion picture film, sporting powder, and the pyroxylin plastics which are put to myriad uses—from scuffless heels for women's shoes to toothbrush handles.

Treated with acetic acid, cotton linters give us another important cellulose derivative used in making acetate rayon, safety X-ray film, aeroplane window shields, fountain pens and lamp shades.

Take a look at your automobile. The safety glass is made safe through the use of a sheet of transparent cellulose plastic sandwiched between two sheets of plate glass. The finish is based on cellulose. The leather-like upholstery is a cotton fabric coated with a cellulose compound. Likewise the steering wheel may be made from a cellulose derivative, and the fabric of a recently-developed heavy-duty tire is rayon made from cellulose. Even the new man-made sponge with which you wash your car had its origin, not in the sea, but in the cotton field or forest of towering spruce.

The draperies and bed spreads in your home, the washable window shades, your wife's gown, the cement that sticks the soles onto her shoes, her handbag, the colourful talon fastener of her gown, her costume jewelry and toilet articles, the tinted enamel she has on her fingernails, her fountain pen, the waterproof binding on the latest "best seller," the transparent wrapping on the candy and other goods you buy, your buttons and buckles, even your fishing tackle, all may have had their origin in the chemist's amazing raw material—cellulose.

Health LEAGUE of CANADA

Will Be Settled Quietly

Maine Residents Along Quebec Border Want To Belong To Canada

Canada and the United States have a chance to show Europe how to deal with "minorities," says the Detroit Free Press.

A number of persons living in the State of Maine, along the Quebec border, are petitioning the Canadian Government to annex them.

They point out that they are cut off from the rest of Maine by forests, that all their dealings are with Canada, and that they are as much Canadians as were their ancestors, who settled this sliver of the Pine Tree States that penetrates Quebec at Estcourt.

Were these good people in Czechoslovakia their petition to another Government to annex them would make headlines.

Over here it is not likely to create much excitement.

A much more exciting time was had by all, a century ago, when settlers along the disputed boundary of Maine and New Brunswick staged the "Aroostook War". Troops were enlisted on both sides, and for a time it looked as though they might come to blows. Gen. Scott dashed up from Washington, though, and negotiated a truce with the New Brunswick authorities, which provided for the joint occupation of the contested ground.

The Webster-Ashburton Treaty of 1842 definitely fixed the northeastern boundary of the United States.

And in doing so appears to have left a number of Canadians and their descendants on the wrong side of the line, as they seem to think.

An Unusual Bouquet

Virginia Ham Presented To Singer At U.S. Music Festival

Miss Alma Milstead, New York soprano, received what she describes as the most unusual "bouquet" in her experience when she sang at South Hill, Virginia, at the May Music Festival.

During a pause in the group of her songs, William Farrar, a senior in the South Hill high school, presented her with a 19-pound old Virginia ham, "an example of real southern hospitality," he explained.

She already had received a more conventional present—a basket of roses from the South Hill Choral Club.

Mounties In England

Enthusiastic Reception In London To Policeman From Arctic Circle

Lance-Corporal Norman George McDowell of the Royal Canadian Mounted Police, stationed at the door of Canada House in London for the first time, was surrounded by a large crowd blocking the entrance, seeking autographs, and taking photographs.

London's reception to the mountie, who spent seven of the last 11 years above the Arctic circle, was enthusiastic.

The London Evening News ran two pictures of Corporal McDowell and his wife and streamer his story: "A Mountie Exchanges Lonely Yukon for Canada House Job."

The Boston Museum of Fine Arts has 138 pottery vessels from the tomb of Pharaoh Cheops' mother, Queen Hetep-heres, who lived 5,000 years ago.

THIS BACKACHE IS AGONY.

KIDNEYS WILL CAUSE IT!

Sluggish kidneys let poisons accumulate in your system. Lame back, lumbago and rheumatic pains often follow. GIN PILLS will give the kidneys the help they need to filter out the poisons that cause the pain. "Prove their merit through their use!"

GIN PILLS

FOR THE KIDNEYS

WHAT HO!

CHAPTER XIV.—Continued

Crump came in.

"Beg pardon, m'lady," he said, "but Captain Duff-Hooper sent his man over to say that he is riding at ten and will be pleased to have you join him."

"Ask him to tell Captain Duff-Hooper that I'm sorry but I shan't be able to ride with him," said Rosa.

"Very good, m'lady."

"And Crump, we're saved."

"Saved, m'lady?"

"The castle and everything. Mr. Bingley has come to our rescue."

"May I express my gratitude, sir," said Crump. "And I think you'll be interested to know that Elaine is in excellent working order, except that she squeaks a bit when she wags."

"Oil her springs," said Ernest.

"I was about to do so," said Crump, and faded from the room.

In the kitchen Crump found Sloat lackadaisically polishing a silver fish-slice and whistling "Happy Days are Here Again."

"Less music and more elbow-grease, if you please," said the butler.

"But happy days are here again, Mr. Crump," said Sloat. "To-day we see the last of that loopy Yank."

"I was not aware that Mr. Bingley intends to leave us to-day," said Crump.

"Well, I saw him packing his things, such as they are. Is he going to shoot the moon, do you think?"

"If, by that vulgar expression, you imply that Mr. Bingley is going to steal away without paying his rent," Crump said, frostily, "you are doing a grave injustice to a most honorable gentleman."

"Well, he's going, and that's something," said Sloat. "Wonder what he'll tip. Good riddance, I say. Happy days are here—"

Sloat rose three inches from the floor on the top of Crump's toe.

"And if you'd like another dose of the same, young Sloat," Crump said, "just let me hear you pass any more remarks about Mr. Ernest Bingley."

In the breakfast room the earl was demolishing his third dish of coddled eggs.

"Rather dressy this a.m.," he remarked. He could not have meant himself.

"Oh, I dressed up for your birthday," Ernest said.

"Did you also pack your bag for my birthday?" asked the earl. "I fell over it in the hall."

"My month is up, you know, sir."

"Don't be a gum-drop," said the earl. "Stay with us as long as you like as our guest."

"Thank you, sir, but I just can't," said Ernest. "I'd like to, though, very, very, very much."

"Name just one good reason why

you won't stay on and at least spend Christmas with us."

"Business."

"Business be blowed," said the earl. "Your people can take care of it. You can keep in touch with them by phone—if we had a telephone. Tell you what—I'll have one put in."

"I'm terribly sorry," said Ernest, "but there is a matter which needs my personal attention. I must leave for New York at once."

"You'll be back, of course."

"Some day, I hope."

"Soon?"

"Not very soon, I'm afraid," said Ernest.

"You'll always be welcome at Bingley Castle, Ernest, old chum," said the earl.

"Thank you."

"Well, if you must go, you must go, I expect," said the earl. "When do you sail?"

"On the first boat I can get out of London."

"We'll miss you," the earl said.

"Won't we, Rosa?"

"Yes," she said, her eyes on her eggs.

"You must keep in touch with us, Ernest," said the earl.

"Yes, sir."

"I collect souvenir post-cards, you know."

"I'll send you some."

"With Indians on them?"

"Yes, sir, with Indians on them."

"That's jolly good of you, Ernest. You must not forget us," the earl said.

"I'll never forget—Bingley Castle," Ernest said.

Ernest, hat in hand, overcoat on arm, stood in the castle hall.

"Sloat is getting out the car," Lady Rosa said. "I hope you don't mind if I don't go to the station with you. I loathe platform good-byes."

"I hate good-byes myself," said Ernest.

"I wish you weren't going, Ernest."

"I don't feel as if I were going home," Ernest said. "I feel as if were leaving home. Staying here was the most beautiful thing that ever happened to me."

"I'm glad you feel that way about us."

"I guess it was the most beautiful thing that ever happened to anybody."

"Will you write to me?"

Ernest did not look at her.

"No, Rosa, I won't," he said.

"You won't? Why?"

"I can't tell you."

"Please—you must."

"It would be—well, it would not be right."

"Not right? Oh, Ernest, I think I understand."

"Do you, Rosa?"

"This matter of business you must attend to personally—tell me, Ernest—is it a girl?"

Ernest Bingley uncreased and creased his hat. In a low voice he answered,

"Yes, Rosa. It is a girl."

"You've never talked about her."

"I didn't think you'd be interested," Ernest said.

"Ernest! You knew—you should have known—I'd be interested."

"Why, Rosa?"

"It doesn't matter now. Are you engaged?"

"Secretly."

"When will you be married?"

"As soon as I reach New York."

"What is she like?" Rosa asked.

"You. I mean she has the same coloring, and voice and eyes—and—"

and things," said Ernest.

"What does she do?"

"Do? Who?"

"Your fiancée, of course."

"Oh, I guess you'd call her a society girl," Ernest said. "Very social. Very athletic. Rides horse-back, drives her own airplanes—the usual things."

"How sporting! She must be painfully rich?"

"Oh, she is. Her father owns all the hotels in Chicago."

"All of them?"

"Except two."

"What's her name?"

"Her name?"

"That's what I said."

"Why it's Rowena."

"Rowena?"

"No, just Rowena," said Ernest.

"Rowena what?"

Ernest hesitated.

"Surely you haven't forgotten," said Rosa.

"Of course not. It's—Castle. Rowena Minerva Castle."

"Pretty name. So you're going from one castle to another."

WILSON'S FLY PADS REALLY KILL

One pad kills flies all day and every day for 2 or 3 weeks. 3 pads in each packet. No spraying, no stickiness, no bad odor. Ask your Druggist, Grocery or General Store.

10 CENTS PER PACKET WHY PAY MORE?

THE WILSON FLY PAD CO., Hamilton, Ont.

Ernest's laugh was distinctly a fourth-rate expression of hilarity.

"That's right. Castle to Castle," he said.

"I hope she'll make you very happy, Ernest."

"I hope you'll be happy, too, Rosa."

"Oh, I'll have fun. No worries about the castle—ours, I mean. Lots of hunting and riding. Why shouldn't I be happy?"

"I suppose," said Ernest—"I suppose you'll marry yourself some day."

"Not myself. But I suppose I shall marry a man, if asked."

"Duff-Hooper?"

"He seems to be leading the field at the moment."

"You won't get married right away, will you?"

"Maybe. Maybe not. I may shop around."

"I wish you would. I mean—well—wait—"

"Why?"

"It would be awful for you to marry anybody—I mean anybody you were not terribly in love with."

"Let's stop talking about me," said Rosa. "You must start soon if you're to catch your train. What can be keeping Father?"

"Where is he?"

"Said he had to go to his study to get something."

"What?"

"A parting gift, perhaps," said Rosa. "I say, Ernest, you must have a picture of Miss Castle with you. I'd be most interested to see it."

"I haven't—I mean—well, I've a sort of picture," said Ernest.

"Please let me see it."

"All right."

He took from his suit-case the old miniature of Lucy Bingley.

"She's charming!" exclaimed Lady Rosa. "And she does look a little like me. Prettier, though."

"She is not."

"Why, Ernest! Is that any way for a bridegroom to talk?"

"It's the truth," he said.

"Never tell Rowena that," advised Rosa. "Why is she in fancy dress costume?"

"Amateur theatricals."

The Earl of Bingley came hurrying toward them, bearing a large package. He presented it to Ernest.

"I want you to have this as a memento of your visit and as a very slight token of my great esteem," he said. "It is not diamonds. I wish it were."

"Thank you very much, sir," said Ernest.

Outside the door there was a sound like a riveting contest in a tunnel.

"I think I hear our car," said the earl. "So does most of Somersetshire, I expect. I say, Ernest, what's that picture?"

"His fiancée," Rosa told the earl.

"Really? Mind if I have a peek?"

He took the miniature of Lucy Bingley from Ernest's hand.

"Jove, she's lovely," he said. He stared hard at Lucy Bingley's comely face. "I could swear I've met her some place. Who is she?"

"Rowena Castle of Chicago," said Ernest, "and you could hardly have met her, sir. She's never been abroad."

The earl wagged his head over the picture.

"I met her twin sister then," he said.

"She has no twin sister."

"Wish she had," said the earl. He handed the miniature to Ernest who stowed it in his bag.

Sloat opened the front door.

"The car is here, m'lud," he announced.

"I thought it wasn't woodpeckers I heard," said the earl. He held out his hand to Ernest.

(To Be Continued)

If only we could tell when the future was beginning!

Originator Of Idea

King Edward VII. Suggested Private Bath For Hotel Rooms

The late King Edward VII. was originator of the idea of every hotel room being equipped with private bath, Charles C. Ritz told reporters. As Prince of Wales the king visited Paris frequently and stayed at the Bristol hotel. A bathtub was brought through the streets and carried to the royal chamber when the prince wanted a bath. The prince suggested to Cesar Ritz that a hotel with bath in every room "would be a paying proposition," and the idea was carried out when the Paris Ritz was opened in 1898.

MAKE READY FOR HOLIDAYING

By Anne Adams

If you're one of those people always on the go, you'll vote Anne Adams' pattern 4789 the most useful outfit in your wardrobe. Together, the three jamor pieces are ideal for golfing. With blouse and shorts, you're all set for tennis or the beach and both costumes can be varied with different sets of sash and kerchief. So simple to make! Just wait 'til you see how rapidly you can stitch up that neat "school girl" collar and handy pocket—that classically graceful skirt opening down the front for a good stride (and easy ironing)! Finish several sets—in different colors and tub fabrics!

Pattern 4789 is available in misses' and women's sizes 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38 and 40. Size 16 entire ensemble, takes 5 1/4 yards 36 inch fabric and 1 1/4 yards contrast. Illustrated step-by-step sewing instructions included.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

Keeping cool used to be the idea for summer, now it's for Europe.

For Your Preserving

Use It This Year

New Operation Method

Puts Patients Back Into Circulation Without Loss Of Time

A method by which a Roumanian physician puts his patients on their feet directly from the operating table was described in the Journal of the American Medical Association.

"This new method is of inestimable advantage in time of war," the Journal's Bucharest correspondent reported on the work of Dr. Campeanu, lecturer at the University of Bucharest.

"The evacuation of war hospitals thus becomes simplified. By shortening the stay of patients in the hospital, the surgical section of Campeanu's clinic in Brasov were able, with the same number of beds, to accommodate 500 more patients than in the previous year."

The articles said in the period from 1934 to 1938, 3,150 patients left their beds the day following the operation without experiencing any disadvantage.

The article said: "An assistant of Campeanu whose appendix had been removed, after having stepped down from the operating table, forthwith acted as assistant at the next operation and afterwards walked about. His recovery was prompt."

The Alexandra Peal

Remarkable Bells Were Gift To British Empire 50 Years Ago

The Ancient Society of College Youths rang the Alexandra Peal, some of the most remarkable bells in the British Empire, on the anniversary of the Coronation. The peal, which hangs in the Queen's Tower of the Imperial Institute, was a present 50 years ago from Mrs. Elizabeth M. Millar, of Melbourne, the only condition of the gift being that the bells should be rung on the birthday and accession day of the Sovereign and the birthdays of the Prince and Princess of Wales. Each of the ten bells is named after a different member of the Royal Family. Their total weight is over eight tons, and when they are in full peal the tower of the Institute sways nearly a foot out of alignment.

The Romans noted the folly of growing the same crops on the same land for several consecutive years, but attention first was called to the value of crop rotation by Dickson, of Edinburgh, in 1777.

A new kind of paint made in Germany is said to be fireproofed by having nitrogen salts and synthetic resin mixed in it.

LOCAL & GENERAL

Mr. Arthur Evans is attending provincial summer school at Edmonton

Mrs. J. R. Erickson and son Alvie of Olds, were visitors with Mr. and Mrs. Ed Watkin on Tuesday.

Adshead Garage are to be complimented on the attractive G.M. neon sign. It sure brightens up that end of town.

Miss Violet Millstead of Toronto was a visitor last week with her aunt, Mrs. H. D. Booker

Mr. A. J. E. Liesemer, of Calgary, is marking examination papers in the capital city

Mrs. R. W. Kneeshaw, Toronto, was the guest of Dr. and Mrs. Evans last week

Mrs. Ranton and Bill spent the weekend at their cottage at Cooking Lake near Edmonton

In a ball game held at Grand Centre last Thursday night, the boys' team from that district defeated Davenport, the score being 16-12

Miss Madge Sproule of Killarney, Manitoba, has taken a position at the American Cafe. She will stay with her sister, Miss Ruby Sproule

Mr. and Mrs. Wm. Ross are spending their vacation at Cremona and Calgary. Bill will be on duty at the Builders' Hardware on Monday

All directors of the Fair Board are expected to be at the Grounds on Saturday afternoon to look after their several departments

Miss Evelyn McGhee and Miss Mabel Weberg left on Wednesday evening to return to Victoria, where they are training in St. Joseph's Hospital.

The Annual Convention of Didsbury U.F.A. and U.F.W.A. Constituency Association will be held at Lone Pine Hall on July 27th. Everyone welcome

Mr. and Mrs. Ed Watkin leave on Sunday for Waterton Lakes and U.S.A. points. They will travel with the house-trailer which Eddie has built

Mr. E. Sauder of Preston, Ontario, who had been visiting his nephew and niece, Mr. Ernie Fisher and Mrs. L. Levens, returned home this week

Canadian Legion Annual Picnic at the Dog Pound west of Didsbury Wednesday, July 27th. Arrange for transportation at Adshead Garage from 11 to 12 noon

Harry Klein who had spent the winter working on waiters' staff in the kitchens of the Kootenay-Bell Mines at Nelson, B.C., was a visitor in town for a couple of days this week

A. Melville Anderson, Optometrist and Optician, 224 8th-Ave.-W., Calgary, established since 1910, will be in Didsbury at the Rosebud Hotel on Monday afternoon, July 25th (2)

Mr. and Mrs. Tom Morris and family motored to Calgary on Sunday. Mrs. Morris and children stayed over for the weekend to visit her sister, Mrs. H. C. Rennie

This week its Edward G. Robinson and Bette Davis at the movies in "Kid Galahad." The truth, the whole truth and nothing but the truth concerning "a match the devil made"

Mr. C. C. Pearson of Puente, California, who had been visiting his son Mr. Harry Pearson and relatives, left on Monday for Wisconsin where he will spend the summer with other relatives

A jolly picnic of the Loyal Temperance League & Little White Ribbons will be held on the lawn at Mrs. C. F. Rennie's this (Thursday) afternoon at 3. Please bring a picnic lunch, plate, cup and spoon. A short business meeting of W.C.T.U. members will be held to make final arrangements for the serving of lunch at the Didsbury Fair

Mr. and Mrs. Harold Clemens and family and Mr. Eddie Clemens of Edmonton, while en route for a motor tour to Kimberley, B.C., called in to see their parents, Mr. and Mrs. M. B. Clemens. Eddie, who for several years has been employed at the Hudson's Bay store in Calgary now holds a position with a furniture firm in Edmonton

LOCAL & GENERAL

Mrs. Dick Haener has a splendid collection of roses growing in her flower garden at Elkton and we understand that she will have a display of her roses at the Fair

Mr. Ray Lantz and his mother, Mrs. P. H. Lantz, who have been on a motor trip to Iowa and other U.S. points, returned home on Monday.

N. S. Clarke & Sons have a splendid exhibit of their Jersey cattle at the Calgary Exhibition this week. Reid Clarke has charge of the herd and is being assisted by Harvey Shantz

Lone Pine Ball Club Reaches League Final

After a long layoff because of rainy weather, Lone Pine Ball Club started up again with brilliant baseball. In their playoff battle with Torrington they emerged victorious, putting Torrington out of the running with two straight victories. In the first game at Torrington they won with the score reading 8-7.

In the second game at Lone Pine, which turned out to be the most exciting game seen here in years, they defeated Torrington 3-1. A circuit clout by Otto Faas was a prominent feature of the game. The boys played errorless ball to provide sterling support for Idris Jenkins, who was credited with both wins on his first performance of the year. Due to a sprained wrist, Dennis Jenkins was replaced by Percy Schumaker who, together with George Campbell, played a brilliant game in the outfield. The team now meets Olds in a decision for the league championship.

The Lone Pine lineup comprised Otto Faas, Idris Jenkins, C. Frizzell, Ronnie Lyons, H. Frizzell, Lloyd Jenkins, Percy Schumaker, G. and H. Campbell.

Patronize the Midway Next Wednesday

Don't forget to patronize the midway at the Didsbury Fair. All the proceeds go to the sports committee to give you a good time; all the attendants give their own time and will give you a square deal. Lots of new games and good prizes.
